

You deserve to get more out of your NFTs

The Future of NFT ownership
starts with ZooDAO

Rewards, Reimagined

By staking your NFTs in ZooDAO's dApp, users are automatically eligible to earn rewards in ZOO tokens, DAI, and collectible NFTs.

**Your NFTs
are more valuable
with ZooDAO.**

NFTs are an enormous, continuously growing store of value.

With the market for NFTs on the rise, we seek to provide NFT owners the option to get more out of their most valuable assets, by enabling users to earn passive income from their digital collectibles.

NFT Battles

Wage battles with eligible NFTs
to earn rewards in ZOO and DAI

Our Values

We commit to delivering interoperability for NFT owners, bridging the gap between the DeFi world and digital asset ownership. We are privileged to earn, and maintain the trust of our users as we safeguard their most valuable assets.

Ensuring the integrity of our platform and gaming mechanism requires robust fair play controls – a principle which is embedded in our culture and practices. To ensure fair play, we built battles based on a no-loss principle. Regardless of outcome, no user should leave with less than they arrived with.

State of the art integration

To deliver on our promise of interoperability, trust and fair play, we've leveraged the infrastructure provided by leading partners.

Yearn.Finance enables us to deliver organic yield, safeguarding return on investments and equitable rewards for all users interacting with ZooDAO.

Chainlink's VRF integration guarantees fair play, providing cryptographically-secure randomness within our NFT battle mechanism.

Aragon's robust, open-source DAO infrastructure enables us to build a truly decentralized governance and community engagement platform.

What we've achieved so far

The best is yet to come

Pre-Launch

- Website UI/UX
- Ropsten Tests
- Internal Audits
- Smartcontracts
- Various Integrations
- Token generation
- DAO launch
- NFT Cards on IPFS

Phase 1

- LBP on Balancer
- External Audit
- Yield Farming on Uniswap v3
- NFT Staking
- NFT airdrops
- Marketing
- Partnerships

Phase 2

- NFT Battles
- InWeb \$ZOO purchases
- dApp on Mobile Devices
- Marketplace
- Additional voting mechanisms
- Advanced Yield Farms

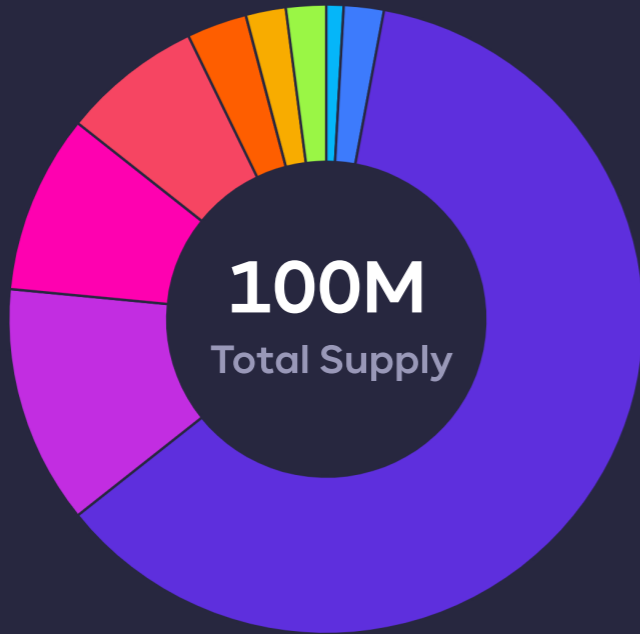

Phase 3

- ZooDAO v2
- In-game Experience Points
- Polkadot Migration
- Fully lead by community
